| Emergency telephone  | :        | Chemtrec: 1-800-424-9300   |

### Section 2. Hazards identification

| OSHA/HCS status                            | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).   |
|--|---|
| Classification of the substance or mixture | : GASES UNDER PRESSURE - Compressed gas   |
| GHS label elements                         |   |
| Hazard pictograms                          |   |
| Signal word                                | : Warning   |
| Hazard statements                          | : Contains gas under pressure; may explode if heated.<br>May displace oxygen and cause rapid suffocation.   |
| Precautionary statements                   |   |
| General                                    | : Read and follow all Safety Data Sheets (SDS'S) before use. Read label before use.<br>Keep out of reach of children. If medical advice is needed, have product container or<br>label at hand. Close valve after each use and when empty. Use equipment rated for<br>cylinder pressure. Do not open valve until connected to equipment prepared for use.<br>Use a back flow preventative device in the piping. Use only equipment of compatible<br>materials of construction. |
| Prevention                                 | : Not applicable.   |
| Response                                   | : Not applicable.   |
| Storage                                    | : Protect from sunlight when ambient temperature exceeds 52°C/125°F. Store in a well-<br>ventilated place.  |
| Disposal                                   | : Not applicable.   |
| Hazards not otherwise                      | : In addition to any other important health or physical hazards, this product may displace  |
| classified                                 | oxygen and cause rapid suffocation.   |
| Section 3 Compo                            | sition/information on ingradients   |

### Section 3. Composition/information on ingredients

| Substance/mixture             |   | Mixture        |
|-------------------------------|---|----------------|
| Other means of identification | : | Not available. |

#### CAS number/other identifiers

| CAS number | : Not applicable. |
|------------|-------------------|
|------------|-------------------|

| Date of issue/Date of revision | : 11/20/2023 | Date of previous issue | : No previous validation | Version : 0.01 |
|--------------------------------|--------------|------------------------|--------------------------|----------------|

### Section 3. Composition/information on ingredients

| Product code : 017039 |                       |                |
|-----------------------|-----------------------|----------------|
| Ingredient name       | %                     | CAS number     |
| Nitrogen<br>R-438A    | 99<br>0.0001 - 0.9999 | 7727-37-9<br>- |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

#### Description of necessary first aid measures

| Eye contact  | <ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br/>eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10<br/>minutes. Get medical attention if irritation occurs.</li> </ul>   |
|--------------|--|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact | <ul> <li>Flush contaminated skin with plenty of water. Remove contaminated clothing and<br/>shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean<br/>shoes thoroughly before reuse.</li> </ul>  |
| Ingestion    | : As this product is a gas, refer to the inhalation section.   |

#### Ingestion : As this product is a gas, refer to the inhalation section.

#### Most important symptoms/effects, acute and delayed

| Potential acute health effect |  |              |
|-------------------------------|--|--------------|
| Eye contact                   | ontact with rapidly expanding gas may cause burns or frostbite.  |              |
| Inhalation                    | o known significant effects or critical hazards.   |              |
| Skin contact                  | ontact with rapidly expanding gas may cause burns or frostbite.  |              |
| Frostbite                     | y to warm up the frozen tissues and seek medical attention.  |              |
| Ingestion                     | s this product is a gas, refer to the inhalation section.  |              |
| Over-exposure signs/symp      |  |              |
| Eye contact                   | o specific data.   |              |
| Inhalation                    | o specific data.   |              |
| Skin contact                  | o specific data.   |              |
| Ingestion                     | o specific data.   |              |
|                               |  |              |
| Indication of immediate med   | ttention and special treatment needed, if necessary  |              |
| Notes to physician            | case of inhalation of decomposition products in a fire, symptoms may<br>he exposed person may need to be kept under medical surveillance f |              |
| Specific treatments           | o specific treatment.  |              |
| Protection of first-aiders    | o action shall be taken involving any personal risk or without suitable  | training. It |

may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

### See toxicological information (Section 11)

# Section 5. Fire-fighting measures

| Extinguishing media<br>Suitable extinguishing<br>media<br>Unsuitable extinguishing<br>media  | <ul><li>: Use an extinguishing agent suitable for the surrounding fire.</li><li>: None known.</li></ul>  |
|--|--|
| Specific hazards arising<br>from the chemical<br>hazardous thermal<br>decomposition products | <ul> <li>Contains gas under pressure. In a fire or if heated, a pressure increase will occur and the container may burst or explode.</li> <li>Decomposition products may include the following materials: nitrogen oxides</li> </ul>   |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Contact supplier immediately for specialist advice. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| Special protective equipment for fire-fighters   | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

# Section 6. Accidental release measures

| Personal precautions, protect  | equipment and emergency procedures  |    |
|--------------------------------|---|----|
| For non-emergency<br>personnel | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel<br>from entering. Avoid breathing gas. Provide adequate ventilation. Wear<br>appropriate respirator when ventilation is inadequate. Put on appropriate<br>personal protective equipment. |    |
| For emergency responders       | f specialised clothing is required to deal with the spillage, take note of any informati<br>n Section 8 on suitable and unsuitable materials. See also the information in "For r<br>emergency personnel".   |    |
| Environmental precautions      | Ensure emergency procedures to deal with accidental gas releases are in place to avoid contamination of the environment. Inform the relevant authorities if the produnas caused environmental pollution (sewers, waterways, soil or air).   | ct |

### Methods and materials for containment and cleaning up

| Small spill | : Immediately contact emergency personnel. Stop leak if without risk.                   |
|-------------|---|
| Large spill | : Immediately contact emergency personnel. Stop leak if without risk. Note: see Section |
|             | 1 for emergency contact information and Section 13 for waste disposal.                  |

# Section 7. Handling and storage

### Precautions for safe handling

| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8). Contains gas under pressure. Avoid contact with eyes, skin and clothing. Avoid breathing gas. Empty containers retain product residue and can be hazardous. Do not puncture or incinerate container. Use equipment rated for cylinder pressure. Close valve after each use and when empty. Protect cylinders from physical damage; do not drag, roll, slide, or drop. Use a suitable hand truck for cylinder movement. |
|--|--|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |

### Section 7. Handling and storage

including any incompatibilities

**Conditions for safe storage**, : Store in accordance with local regulations. Store in a segregated and approved area. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Keep container tightly closed and sealed until ready for use. Cylinders should be stored upright, with valve protection cap in place, and firmly secured to prevent falling or being knocked over. Cylinder temperatures should not exceed 52 °C (125 °F).

### Section 8. Exposure controls/personal protection

| •                                |  |
|----------------------------------|--|
| Control parameters               |  |
| Occupational exposure limi       | ts   |
| Nitrogen<br>R-438A               | Oxygen Depletion [Asphyxiant]<br>None.   |
| Appropriate engineering controls | : Good general ventilation should be sufficient to control worker exposure to airborne contaminants.   |
| Environmental exposure controls  | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |
| Individual protection measu      | res  |
| Hygiene measures                 | Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.  |
| Eye/face protection              | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.  |
| Skin protection                  |  |
| Hand protection                  | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. |
| Body protection                  | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Other skin protection            | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection           | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.  |

# Section 9. Physical and chemical properties

| Appearance                        |  |
|-----------------------------------|--|
| Physical state                    | : Gas.   |
| Color                             | : Not available.   |
| Melting/freezing point            | : -210.01°C (-346°F) This is based on data for the following ingredient: nitrogen. |
| Critical temperature              | : Lowest known value: -146.95°C (-232.5°F) (nitrogen).                             |
| Odor                              | : Not available.   |
| Odor threshold                    |  |
|                                   | : Not available.   |
| pH<br>Fleeb neint                 | : Not available.   |
| Flash point                       | Not available.   |
| Burning time                      | : Not applicable.  |
| Burning rate                      | : Not applicable.  |
| Evaporation rate                  | : Not available.   |
| Flammability (solid, gas)         | : Not available.   |
| Lower and upper explosive         | : Not available.   |
| (flammable) limits                |  |
| Vapor pressure                    | : Not available.   |
| Vapor density                     | : Highest known value: 0.97 (Air = 1) (nitrogen).                                  |
| Gas Density (lb/ft <sup>3</sup> ) | : Only known value: 0.072 (nitrogen).  |
| Relative density Solubility       | : Not applicable.  |
| Solubility in water Partition     | : Not available.   |
| coefficient: n-octanol/water      | : Not available.   |
| Auto-ignition temperature         | : Not available.   |
|                                   |  |
|                                   | : Not available.   |
| Decomposition temperature         | : Not available.   |
| SADT                              | : Not available.   |
| Viscosity                         | : Not applicable.  |
| Saction 10 Stabili                | ty and reactivity  |

### Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                | : No specific data.  |
| Incompatible materials             | : No specific data.  |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |
| Hazardous polymerization           | : Under normal conditions of storage and use, hazardous polymerization will not occur.                 |

| : No known significant effects or critical hazards. |
| : No known significant effects or critical hazards. |
|   |

#### Numerical measures of toxicity

Acute toxicity estimates Not available.

# Section 12. Ecological information

#### **Toxicity**

Not available.

#### Persistence and degradability

Not available.

#### **Bioaccumulative potential**

| Product/ingredient name | LogPow | BCF | Potential |
|-------------------------|--------|-----|-----------|
| Nitrogen                | 0.67   | -   | low       |

#### Mobility in soil

| Soil/water partition | : Not available. |
|----------------------|------------------|
| coefficient (Koc)    |                  |

Other adverse effects : No known significant effects or critical hazards.

### Section 13. Disposal considerations

**Disposal methods** 

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Empty Airgas-owned pressure vessels should be returned to Airgas. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Do not puncture or incinerate container.
